DASARATH K N

MERN Stack Developer

Malappuram,India • +91 9947695010 • dasarathkn2001@gmail.com • LinkedIn• Github • Website

- PROFILE SUMMARY-

Skilled full-stack developer proficient in the MERN Stack, seeking to leverage expertise in innovative web applications. Strong foundation in HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB. Committed to delivering robust, user-friendly solutions while staying current with industry standards. Dedicated self-learner focused on continuous improvement and embracing new technologies.

- SKILLS -

Front-end Development - React js,Javascript,Typescript,Redux,HTML,Tailwind CSS,Bootstrap,Figma.
Back-end Development   - Node js & Express,MongoDB,MySQL,Firebase.
Additional Skills & Tools - GIT,Github,AWS,POSTMAN,Docker,Data Structures,JWT.

- PROJECTS-

Shozey ,*E-commerce Platform*   Live   GitHub

- Fully-featured e-commerce site specialising in men's and women's fashion, highlighting trending shoes and exclusive offers.
- Seamless user experience with robust authentication, Email/OTP registration, advanced search and filtering capabilities, and personalised user profiles.
- Integrated wallet and Razorpay for secure and convenient payment processing.
- Efficient admin interface for streamlined management, including coupon management and dynamic product offers.
- Built with JavaScript, Node.js, Express, MongoDB, JWT, Ajax, EJS, AWS, EC2, and Nginx.

-MINI PROJECTS-

OLX clone, *Buy and sell platform*   GitHub

- Developed a functional OLX clone allowing user registration, login, and product listing/selling functionalities.
- Implemented robust user authentication using Firebase, ensuring a secure user experience.
- Utilised Firebase for the database, with HTML/CSS and React.js, to create an interactive platform.

Users 2.0,*User Management Application*   GitHub

- A hands-on project utilising React and Redux for efficient user management.
- Admin module offering user operations such as add, edit, remove, and search, alongside authentication features.
- Comprehensive tech stack including Node.js, Express, MongoDB, React, Redux, with supplementary modules like Multer, Bcrypt, and JWT for enhanced functionality, with Tailwind CSS for design.

Netflix Clone,*Digital Platform using TMDB API*   GitHub

- Developed a Netflix clone using React, leveraging the TMDB API.
- Implemented features including movie listings sourced from TMDB API and movie trailers displayed via React YouTube.
- Designed a user-friendly interface resembling the Netflix platform for intuitive navigation and viewing experience.

- EDUCATION -

MERN Stack Developer Trainee- Brototype Calicut,India   *2023-Present*
- Self-learning platform (Industry experts assign and review projects)

Bachelor's in Computer Science- University of Calicut   *2020-2023*

- Graduated with First Class
